

Frontend Engineer specializing in **React**, **TypeScript**, **Next.js** and **Angular**. Built and maintained production web applications for legal tech and enterprise clients, including a GDPR compliance platform used by companies like Sahibinden and MNG Cargo. Worked as the **sole frontend engineer** on that platform, owning the work from planning and architecture through to production support. Comfortable refactoring large codebases, building reusable component systems, and working closely with product, design, and backend teams to ship reliable features. Holds a degree in **Architecture**, which shapes a structured, practical approach to designing and building software.

WORK EXPERIENCE

Frontend Engineer

September 2023 — December 2025

Jurcom GRC Services

Remote

A Dutch legal tech company providing privacy, compliance, and data protection solutions through digital platforms.

- Built and maintained **GDPR compliance platforms** used by enterprise clients including **Sahibinden** and **MNG Cargo**, helping data protection officers manage their compliance work.
- Served as the **sole frontend engineer**, owning frontend architecture, technical decisions, implementation, documentation, and production support while working directly with product, design, backend, and business stakeholders.
- Built reusable UI components and shared frontend systems that accelerated feature development and maintained a consistent user experience across the platform.
- **Refactored a large React codebase** by modularizing components, improving state management patterns, and removing duplicated logic, making it easier to maintain and extend.
- Collaborated closely with backend engineers, product managers, and designers in an Agile Scrum environment to deliver new features and improvements.
- Improved **accessibility** across key user flows, making the platform more usable for people relying on assistive technology.
- Diagnosed and fixed **performance and rendering issues** using profiling, Sentry, and production debugging.

Frontend Engineer Intern

June 2023 — August 2023

Anibal Bilişim

Istanbul, Türkiye

A software development company based in Istanbul, specializing in creating custom enterprise web applications.

- Contributed to building responsive frontend components using **Angular** and **Next.js**, while learning about design patterns and applying the **composition pattern**.
- Gained experience in an **Agile Scrum** team by actively participating in **sprint planning**, **refinement sessions**, and daily stand-ups to better understand the development workflow.

SKILLS

Languages	JavaScript, TypeScript
Frontend	React, TypeScript, JavaScript (ES6+), Next.js (App Router), Material UI, Redux, Zustand, TanStack Query, React Hook Form, Zod, HTML, CSS, Tailwind CSS, SCSS/SASS, Styled Components, shadcn/ui, Framer Motion
Testing & Tools	Jest, Vitest, Playwright, Git, GitLab, Vite, Vercel, Sentry
Also familiar	Python, Angular, Node.js, Express.js, REST APIs
Communication	English, Turkish, Persian

EDUCATION

Istanbul Technical University, Bachelor of Science in Architecture

2019 – 2024

- Applied analytical thinking, structural design, and user experience principles from architecture to software development, enabling a seamless transition into frontend development.
